

RENK

RENK SUPPLIER PORTAL

Quick Guide

OBJECTIVES & GOALS OF THE RENK SUPPLIER PORTAL

The RENK Global Procurement landscape becomes a **state-of-the-art architecture** to meet the requirements of a **global strategic supplier collaboration**.

A **Global Procurement system** at RENK improves **supplier management** and creates **globally, harmonized strategic processes**.

The **RENK Supplier Portal** supports a high level of **process automation and data accuracy** and ensures a **proper supply chain risk management** including **adherence to local and global laws**.

The RENK Supplier Portal is **entirely free of charge** for our suppliers and business partners

ADVANCED SUPPLY CHAIN COLLABORATION ARCHITECTURE

GENERAL INFORMATION

The RENK Supplier Portal is accessible to all suppliers who **successfully complete the self-registration and on-boarding process** or have been directly invited via the **RENK Global Procurement team**.

The registration process requires suppliers to **provide accurate, comprehensive, and timely information** for RENK's due diligence, risk management and compliance procedures.

It is incumbent upon suppliers to ensure their profiles remain up-to-date, reflecting the most recent corporate data, including but not limited to: legal entity name, principal place of business, contact information, and key stakeholder details.

Suppliers accept responsibility for any inaccuracies or outdated information and acknowledge that such inaccuracies may impact their status and operation within the portal.

After completion of the registration process and successful activation of the supplier's account, the supplier will receive a registration confirmation by e-mail including login information in form of a user name and password.

The **RENK Supplier Portal** is accessible via: supplier-portal.renk.com
