RENK AMERICA MARINE & INDUSTRY

Investing
in America.
Powering
the Fleet.

 We power freedom.

Military and marine propulsion gearing requires a unique approach to both design and system integration. Whether it is clean-sheet or standard design, RENK Marine & Industry provides the expertise and experienced personnel necessary to not only meet the demanding specifications of the U.S. military and industrial applications, but also complete system packages required by application specification or certification.

Manufactured domestically. Trusted internationally.

As a full-service manufacturer of precision gears and transmission systems, RENK America Marine & Industry delivers custom solutions, including specialized rotating hardware and fully enclosed drive systems, leveraging advanced in-house capabilities to meet the most demanding requirements of the U.S. Navy and its allies.

RENK America Marine & Industry supports key U.S. Navy platforms including DDG destroyers, SSC ship-to-shore connectors, TAO fleet oilers, and AOE fast combat support ships – while also delivering advanced gearing solutions for integral gear compressors, steam turbine drives, and power generation applications where reliability and efficiency are essential.

Founded in 1907 as Cincinnati Gearing Systems. Operating as RENK America Marine & Industry since 2025.

RENK

RENK Group. We power freedom.

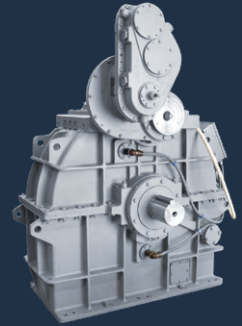

Every destroyer in the U.S. Navy is powered by RENK technology (generator sets). The DDG-51 is supported by the gas turbine to generator drive built and serviced by RENK/RENK America Marine & Industry. Over 220 units have been delivered to the U.S. Navy throughout the life of the program.

RENK provides the propulsion system for the National Security Cutters and Offshore Patrol Cutters used by the USCG.

RENK America Marine and Industry manufactures the gearboxes for the U.S. Navy's Ship-to-Shore Connector.

Naval products and major programs of RENK America Marine & Industry

- DDG-51
Gas turbine to generator drive
Critical shipboard power generation service
- Ship-to-Shore Connector
US Navy's single source for LCAC-100 gearboxes
- LCAC
Lift and propulsion package
Authorized U.S. Navy service center
- Littoral Combat Ship
MT-30 transfer gearbox
- TAO Fleet oilers
- AOE Fast combat support ships
- Torpedo ejection systems
- Minesweeper

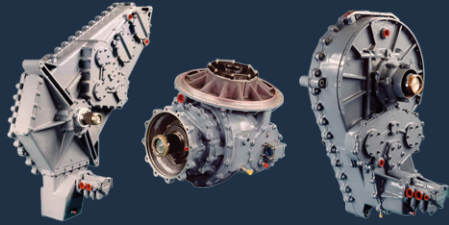

Commercial marine

- Gear units for commercial ferries, megayachts and patrol boats including hybrid propulsion systems
- Parallel shaft and epicyclic configurations
- SISO, SBS COGAG, CODAG arrangements
- Light weight aluminum housings
- Integrated lube oil support packages
- Standard ratios available

Sustainable lifecycles

Our integrated lifecycle services extend far beyond manufacturing. RENK America Marine & Industry provides repair, overhaul, upgrades, testing, and field support to maintain readiness across both defense fleets and industrial assets. Our focus is: maximize uptime, extend service life, and reduce lifecycle cost.

By combining legacy mechanical expertise with modern engineering tools, we deliver drivetrain solutions that increase operational availability. Supported by RENK's global sustainment network, we enable long-term performance.
